

Research Committee Update March 2020 for BCPA Semiannual Meeting

The research committee, composed of Liz Huxter, Ali McAfee, Gerry McGee and chaired by Heather Higo, assembled and submitted research updates from current projects funded by BCPA. They also followed new research and developing ideas throughout the past fall and winter. Some suggestions for future potential projects have been put forward to make use of current available funding but as yet, the research committee has made no specific project recommendations for the coming season. The possibility of a tech transfer team in BC is also being evaluated, and discussions are ongoing as to the best use of the available funding.
